- Must report any and all unsafe conditions to your supervisor or jobsite supervisor
- Must observe all safety precautions and rules specified by federal, state, and company regulations
- Must report all accidents, injuries, and incidents, immediately and complete a report for the same on the day of occurrence
- Must attend required safety meetings, wear proper work attire (hard hat, safety glasses, vest, work boots, etc.)
- Must drive and operate the truck safely and deliver materials to various locations

## **Pre-trip Activities**

- Perform NYS DOT regulated safety pre-trip inspection of assigned vehicle (i.e. check oil, water, fuel, lights, tires, etc.) and conduct airbrake check test. If there are any deficiencies found you are to notify the maintenance supervisor and follow his instructions. If there

are no defects found you will turn in your pre-trip inspection sheet and contact dispatch for your first assignment

- Perform a NYS DOT regulated post-trip inspection and write up any vehicle maintenance problems or potential problems to ensure the vehicle is operable for the next day

### **Loading Procedures**

- Report to your assigned batch plant and notify the batch plant operator that you have arrived and are ready to be loaded out. Once instructed to load out, spot and secure your truck under the plant to receive materials and then enter the batch plant.
  - Verify directions to the jobsite prior to leaving
- Verify the load size on the ticket to determine the correct pressure setting on your booster axle for proper load distribution

### **Quality Control**

- Visually inspect the mix for proper materials, verify load size to the ticket, visually inspect the slump with aid of slump meter and adjust slump according to the ticket
- Visually inspect the ticket information to match the driver and truck number, and check the ticket for any special admixtures or other items needed (re-bar or fiber)
- Expeditiously wash down your mixer and complete a walk around to ensure your vehicle is road ready (nothing hanging off your vehicle, stones washed off the fenders, mirrors and windows are clean, etc.)

### **Highway Driving**

- Drive in compliance with State and local traffic laws and extend courtesy to other vehicles on the roadway
- Deliver concrete as directed by dispatch through knowledge of expeditious routes

### **Job Site Operations**

- Evaluate the safest and best way to enter the job site, get your delivery ticket signed and collect any COD money prior to entering the job site if possible
  - Confirm with the customer where the material is needed and, if necessary, make suggestions for alternative safe dumping locations
    - Make decision regarding dump location based on safety considerations
- Hang chutes as required using proper lifting methods, and unload concrete at the job site without damage to equipment, framework, utilities, adjacent properties, etc.
  - Work with the customer to achieve maximum customer service
- Complete the wash down procedure at the job site in the location specified by the customer, and then perform a walk around inspection of your vehicle to make sure all of your equipment (chutes, hoses, and ladders) have been secured for travel
  - Notify dispatch that you are 10-3 and request your next destination

### **Throughout the Day**

- Process required paperwork (truck reports and trip tickets)
- Maintain appearance and condition of your assigned vehicles

### **End of Shift Duties**

- Wash out the drum, fuel your vehicle, and clean the outside
- Perform a NYS DOT regulated post-trip inspection and write up any vehicle maintenance problems or potential problems to ensure the vehicle is operable for the next day
- If you write up a safety related problem, contact the maintenance supervisor and review your write-up prior to leaving.
  - Punch out and have a great night
